

INK DOSER

B200-B300

TECHNICAL FEATURES

Dosage	Sequential gravimetric with fixed head up to 16 circuits + 1 additional for the dosage of the water (or solvent)
Flow rate	8-10 L/min (up to 2000 cPs)
Accuracy	+/- 5g (higher precision on request)
Dosing head	Fixed with lodging of maximum 16 valves with 10 mm aperture and ϕ 230 mm
Washing	Intelligent washing system with independant valves. Optimization of the waste water
Pumps	Diaphragm with double membrane and damper flow
Storage	200 L drums
	Palletizable IBC
	INOX tanks on project
	Interface with existing tanks
	Armed lids with suction and recirculation
	Level sensors and agitation system available on request
Can lodging	Extractable tray with electronic scale lodging (B200) Foor electronic scale compartment (B300)
Scale	35 kg electronic scale with electromagnetic compensation and precision +/- 0,1 g (B200) 150 kg electronic scale with electromagnetic compensation and precision +/- 2 g (+/- 0,2 g on request) (B300)
Filtres	Y filtres with variable dimension grid according to the requests
